

Master the tools. Meet the people.

Red Hat Czech is organizing a conference for all open source developers that will be held in Brno, Czech Republic, on February 17-18, 2012.

The conference is our annual event which has a goal to put various teams together, convey news from various projects and also get community people informed and involved in them.

The conference is a two-day event with presentation tracks and hands-on labs. Speakers are not only Red Hatters from Brno office, but also invited speakers from all over the world.

We'd like to invite you to participate in this worthwhile event! If you want to participate, visit www.devconf.cz or email eischmann@redhat.com or rvokal@redhat.com.

Sincerely,
Radek Vokál
